# Building Dynamic Routes with Route Parameters

Nertil Poci

Software Engineer

Overview

Route Parameters

- Create routes with parameters
- Read route parameters
- Convert route parameters into component props
- Matching route parameters with custom regex

Customize Router Links

- Add custom content inside router links

Creating Routes with Parameters

Reading Route Parameters from Components

Converting Route Params to Component Props

Adding Custom Regex to Route Parameters

```
{

  path:'/restorants/:id',

  name:'restorantdetails',

  component:RestorantDetails

},
```

◄ ([^/]+) Any character besides /

Customizing Router Links

Summary

Dynamic Route Matching
- Route parameters
- Passing props to components from router
- Custom parameter matching using regex

Router Link Customization
- Customize router link component content
